

# Final Project Submission Guidelines and Deliverables

You have completed a series of hands-on labs that focused on data analysis, visualization, and dashboard creation using real-world datasets. These labs covered tasks such as exploring and analyzing data, creating meaningful visualizations, building dashboards, and interpreting results to derive insights using the Stack Overflow Developer Survey data.

The final task of this capstone project is to create a professional presentation that summarizes the results of all tasks completed in the previous modules and labs. This presentation should clearly communicate your analysis, visual findings, and insights related to technology trends, databases, job opportunities, and other key observations derived from the dataset.

By completing this Data Analyst Capstone Project, you will demonstrate your ability to analyze data, create impactful visualizations, and translate insights into clear, actionable findings suitable for real-world decision-making scenarios.

## Presentation Template

Download the Microsoft PowerPoint presentation template from the link below:

[Data Analyst Capstone PowerPoint Template](#) 

**Note:** If you do not have a desktop version, follow the instructions from the previous lab to access PowerPoint Online.

## Instructions for Completing the Presentation

- Complete all slides with relevant details.
- You may add additional slides, charts, and tables as needed.
- Include any additional unused charts or tables in the appendix if they are relevant to your analysis.

**Note:** You may add a text box to the master slide and use it as a watermark across all slides to help prevent plagiarism.

## File Submission Requirements

After completing the PowerPoint presentation:

- Convert it to **PDF format**
- Name the file: **Data Analyst Capstone Project Report**

## Submission Options

You can submit your project deliverables using **one** of the following options:

### Option 1: AI-Graded Submission and Evaluation

- Complete all notebooks and the presentation
- Convert the PowerPoint presentation into PDF format
- Submit the downloaded file for AI-based evaluation
- Receive automated grades instantly after submission

### Option 2: Peer-Graded Submission and Evaluation

- Complete all notebooks and the presentation
- Upload your PDF for peer review
- Receive grades based on evaluations from peers

## Recommendation

We recommend using **Option 1 (AI-Graded)** for faster grading. However, if you experience difficulties or cannot access this option, you may choose **Option 2 (Peer-Graded)** instead.

**Important Note**

You must choose **only one submission option**—either AI-Graded or Peer-Graded—to receive grades for the final assignment. Do not submit through both options.
